Viron P300 Pool & Spa Pump

Install a Viron P300 3 speed pool pump and relax with the knowledge that you will be reducing your electricity costs, helping the environment and providing your family with a crystal clean and healthy pool.

The Viron P300 pump utilises state of the art permanent magnet brushless 3 speed DC motor which has been developed to dramatically decrease your operating costs. Unlike conventional single speed motors, which work at maximum capacity at all times, the Viron P300 adapts to the task at hand reducing your electricity consumption and saving you money all year round.

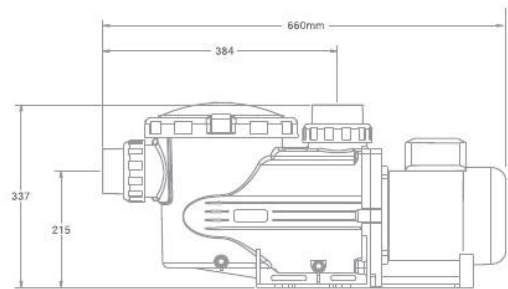

The Viron P300 is also significantly quieter than conventional pool pumps. So quiet that it can be operated at times simply not feasible for other pumps. This means you can use your pump during off peak electricity times reducing your power bill even further.

With the Viron P300 installed you will have the advantage of reduced chlorinator size, increased sanitiser stability and reduced wear and tear on your filtration plus more efficient cleaning of your media filter all to help your pool equipment last longer and reduce the lifetime operating costs of your pool.

The environmental savings are equally impressive with the Viron P300 saving up to 1 tonne of Co2 emissions each year when compared to a conventional pump.

The Viron P300 Pump is covered by a limited 3 year warranty against defects in materials and workmanship.

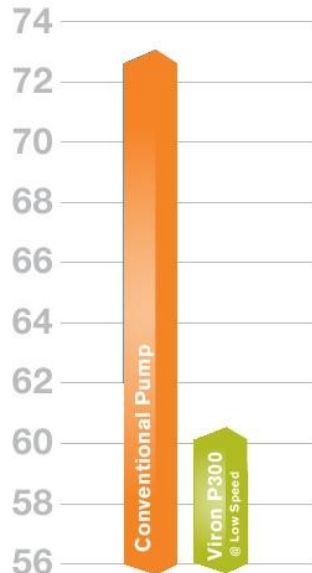

To calculate how much you could save on electricity cost visit www.astralpool.com.au

CO2 Emissions Viron P300 v Conventional Pool Pump (Per Day)

Noise Level dBA at 1 Metre Viron P300 v Conventional Pool Pump

The recommended operating speed for the P300 Pump is eco speed.
